

I drive almost 700 miles per week just in the Dallas/Ft. Worth area. Without XM's Instant Traffic and Weather reports for this area, I'd be stuck a whole lot more than I am. I instantly am aware of what highways to avoid due to an accident and know when to get off the road and find shelter. The regular radio stations take too long to provide this information to the public and are not as current with their information. With regular broadcasting, I was caught in a tornado because they had no alert system!! With XM, I easily avoided it and safely returned home. I gladly pay for this safety privilege. I'd rather pay more than to have it discontinued!!
